Resistance kit		(2)
Solar kit		(2)
Ianus kit + Managed accessories		(2)
Dry-cooler kit		(2)

Price list and AFTER-SALES information
Preliminary inspections

Description	Net price	Note
Preliminary inspections		

Notes

- The prices indicated are valid for the commissioning activities included in the sales order together with the groups to which they refer. For interventions requested after the sale of the units, reference will be made to the rates for Technical Interventions.
- The prices are valid for interventions carried out within 50 km from the local CAT office. For longer distances, it will be necessary to add the costs of the mileage reimbursement and of the travel hours to the rates provided for the Technical Interventions.
- Any additional expenses incurred for the execution of the intervention (such as, for example, road tolls, parking, overnight stays, airline tickets, etc.) will be reimbursed at the bottom of the list, upon presentation of adequate supporting documents.
- Out-of-warranty interventions can be managed directly with the TAC in the area.
- If the goodwill cannot be concluded due to the absence of the requirements listed in the application form or, in any case, for reasons beyond the responsibility of Fiorini Industries S.r.l., the subsequent intervention will be carried out for a fee based on the rates listed below.

(1) The price DOES NOT include the construction of the refrigeration lines connecting the indoor and outdoor units, the execution of the vacuum and the refrigerant charge; if necessary, these transactions will be requested explicitly and will be listed separately.

(2) The price DOES NOT include the installation of accessories, whose assembly is the responsibility of the customer.

(3) The price is applicable to each unit of any type to be put into service on the same site of a group for which the first start-up has been envisaged and for which this intervention has not been explicitly quoted. For example, if in the same site there are a GEO 12 unit and two SET 25 units in cascade and an HPT group, the following rates must be applied

Example

GEO up to model 16	
SET to start on the same site as the GEO x 2	
Waterfall Kit SET x 2	
HPT (without inverter) to be started on the same site as the GEO	
TOTAL	

Technical interventions

Description	Net price	Note
Ordinary technical labor (work and travel)		(4)
Extraordinary technical manpower (work and travel)		(4)
Festive labor (technician, work and travel)		(4)
Meal refund (if the surgery takes more than half a day)		(4)
Mileage reimbursement (round trip)		(4)

Notes

- The above prices apply to interventions invoiced by Fiorini Industries S.r.l., while if the customer contacts the local TAC directly, he will have to agree on the conditions with the latter.
- Any additional expenses incurred for the execution of the intervention (such as, for example, road tolls, parking, overnight stays, airline tickets, etc.) will be reimbursed at the bottom of the list, upon presentation of adequate supporting documents.

(4) Out-of-warranty interventions can be managed directly with the local TAC.
